

Profile Summary

B.Tech Computer Science student passionate about Data Science, Machine Learning, and Artificial Intelligence. Experienced in Python, SQL, NLP, and data analysis through academic projects and a Data Scientist internship at Celebal Technologies. Eager to apply analytical and technical skills to solve real-world problems.

Technical Skills

Languages & Core: Python, SQL, C++, Data Structures, Multiprocessing, OOP
Data Science & ML: PyTorch, TensorFlow, Keras, Scikit-learn, OpenCV, Pandas, NumPy, NLP
Tools & Frameworks: Flask, Streamlit, Git/GitHub, Jupyter, SQLite, Arch Linux
Web & Tools: Streamlit, Flask, HTML, CSS, AWS, Docker

Professional Experience

- Celebal Technologies**
Data Science & AI/ML Intern

Remote
May 2025 – July 2025

 - Developed a machine learning-based student score prediction system using academic, demographic, and behavioral features to estimate final student performance.
 - Performed data preprocessing, feature engineering, and exploratory data analysis (EDA).
 - Trained and evaluated regression models and comparing performance metrics such as MAE, MSE, and R² score.
- Edunet Foundation (Shell)**
AI/ML Intern

Remote
April 2025 – May 2025

 - Developed CNN-based animal image classifier using transfer learning.
 - Improved generalization via augmentation and preprocessing.
 - Reached ~92% validation accuracy.
- Upflairs pvt ltd**
AI & ML Intern

Remote
June 2024 – Aug 2024

 - Trained supervised learning models including SVM, k-NN, and NLP-based neural networks.
 - Boosted model accuracy by **10-15%** through rigorous feature scaling and hyperparameter tuning.

Key Projects

- Qwen Ternary Quantization Framework** | *Python, PyTorch, LLM Optimization*

 - Developed a ternary quantization pipeline to compress Qwen-1.4B model weights, reducing memory footprint by ~60–70%.
 - Benchmarked quantized vs full-precision models to evaluate latency-accuracy trade-offs.
 - Optimized inference workflow for efficient deployment on consumer GPUs (RTX 3050 class).
- Face Recognition Attendance System** | *Python, OpenCV, Computer Vision*

[Github](#)

 - Built a real-time attendance system using an OpenCV-based face recognition pipeline.
 - Achieved ~95% identification accuracy under controlled lighting conditions.
 - Automated attendance logging with structured updates in ui as well as stored in CSV format.
 - Implemented real-time face detection and identity matching for seamless attendance marking

Education

B.Tech in Computer Science Engineering Amity University Rajasthan	2022 – 2026 CGPA: 7.94
Class XII (Senior Secondary) RBSE Spectrum Global Academy, Shahpura	2020 – 2021 Percentage: 91.33%

Achievements

- Winner (1st Place):** Hackathon at Amity University, Jaipur (2024).
- Runner-up (2nd Rank):** Sphinx Event at MNIT University, Jaipur (2025).
- Ranked (Tooper):** Google arcade Cloude, Google (2025).
